Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

Academic Program and Course Description Guide

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts ar	nd terminology:
0 0-1-0 p 00	
Academic Pro	rogram Description: The academic program description provides a
brief summary	y of its vision, mission and objectives, including an accurate
Ž	
	2

description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description</u>: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission:</u> Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure</u>: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies</u>: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extracurricular activities to achieve the learning outcomes of the program.

1. Program Vision

The College of Administration and Economics seeks to prepare graduates in the field of accounting sciences to work in government departments and the private sector and to benefit from specialization in the practical and applied field.

2. Program Mission

Working to prepare and graduate leading scientific and leadership competencies in the field of accounting sciences and to develop the balance of knowledge in the field of scientific research in the field of accounting to serve the local, regional and international community, as well as training and refining the minds of students scientifically and cognitively, and emphasizing social and cultural values and responding to the requirements of the local market.

3. Program Objectives

- Developing accounting knowledge and linking it to the practical side.
- Understand accounting sciences and solve existing accounting problems.
- Analysis of accounting data through the use of computer software.
- Develop basic skills in financial analysis and develop data presentations.
 Understand mathematical methods and methods in solving accounting problems.
- Open channels of communication with state institutions and departments,
 especially those concerned.
- Dealing with accounting problems and developing solutions to them.
- Developing curricula in line with scientific development and the labor market

4. Program Accreditation

Iraqi Ministry of Higher Education and Scientific Research / Sectoral Committee

5. Other external influences

2. Expected learning outcomes of the program

Didn'tyou know

- Collect, analyze and interpret financial statement results to aid in decision-making.
- Ability to take peaceful action in the light of analysis and interpretation of those findings.
- Introducing and understanding the importance of accounting standards as inputs in writing reports.
- Linking the analysis and interpretation of the results of financial statements and administrative decisions based on them to the needs of society for the purposes of development and development in various fields.
- Increase understanding and knowledge by addressing science and other knowledge.

Skills

- Skills of analysis, classification and accounting classification.
- Use the various techniques required by the study of the current curriculum.
- Writing research, reports and graduation projects in various accounting, financial and administrative topics.

Values

Work initially to consolidate the value aspects of the student's economic subjects as they are important basic subjects that achieve the concept of economic sciences in all societies, small and large, with an emphasis on the role of the economics student in achieving this deep value goal in society through his work after graduation. It is certain that planting this value situation will enhance the student's desire for the methodological materials adopted in the field of economics, because it is an important basis in the formation and development of his abilities to receive and adopt the elements of academic tension through discussion and dialogues and raise questions related to reality and inspired by practical life and from the arenas of work and economic and development activities real.

Teaching and learning strategies

Explain the vocabulary according to the curriculum prepared in the sectoral environment, taking into account the innovation.

Use practical examples as an educational tool to increase subject-specific skills.

Use the system of individual small projects or groups.

Use abstracts for recent research and present them in class

4. Evaluation methods

Competition in lecturing.

Mini-panel discussions.

Participate in discussion and dialogue.

Daily and quarterly tests.

Eaculty

Adopting academic dialogue methods in lecture management for the purposes of achieving coherence between the academic curriculum and practical reality, which provides an opportunity to evaluate outstanding students.

Professional Development

Mentoring new faculty members

- Participation in teaching methods courses.
- Participate in educational technology courses.
- Participate in all committees with the former staff to gain experience.

Professional development of faculty members

Updating the curricula to be in accordance with the controls of the knowledge environment.

Reading and analyzing external scientific sources, theses, authored books.

Writing reports and research on courses at the end of each course.

Panel discussions.

Participation in external and internal conferences in the jurisdiction.

Acceptance Standard

Central Admission

The standard followed is the student's average

But thanks to taking into account the student's desire to choose, even if it is impossible to choose the college, but at least this is taken when choosing between departments because it is

very important on which the future of the entire student depends.

The most important sources of information about the program

Methodological books, laws and constitutions.

Books written by the department's teachers.

Local and foreign letters, theses and periodicals.

Sectoral body.

Program Development Plan

Introducing modern systems in the teaching process.

Introducing the teaching staff to courses on modern computing programs.

Participation of teachers in external conferences in developed countries.

Publishing research and literature by teachers in international containers

Course Description Form

1. Course Name:	
General Arabic	
2. Course Code:	
101L	
3. Semester / Year:	

Second semester/first academic year

4. Description Preparation Date:

3-4-2024

5. Available Attendance Forms:

Official working hours

6. Number of Credit Hours (Total) / Number of Units (Total)

15 hours

7. Course administrator's name (mention all, if more than one name)

Name: Jafar Talb Kareem Email: jafar.talb@gu.edu.ig

8. Course Objectives

Course Objectives

- A- Providing the student with linguistic skills
- B- Developing students' linguistic rhetorical abilities
- C- Enabling students to write correctly, free spelling errors
- D- Introducing students to some eloqu literary texts to develop their literary taste

9. Teaching and Learning Strategies

Strategy

- -The teaching method varies according to the students' understanding The standard method is to give the rule first, then the examples shown for thall.
- -Inductive method: Students are given examples first, then the rule deduced from the examples
- -Participation in the classroom
- -Providing various activities
- -Monthly tests and quiz
- Urging students to review some linguistic sources such dictionaries

University Department / Center	Accounting			
Course name/code	Financial Accounting 1/1101m mm 1			
Programs in which he enters	Project of developing and updating the curricula of the College of Administration and Economics in Iraqi universities – Bachelor of Accounting			
Available attendance forms	Classrooms			
·Year/Semester	2023-2024 / First Semester			
Number of study hours (total)	48			
Date of preparation of this description	2024			
Course Objectives				
Enable the student to know	w what accounting is, the business environment,			
the basic functions of acco	ounting and the users of accounting information			
Knowing how to apply prac	ctical accounting from the objectives,			
assumptions, principles an accounting	d types of restrictions for traditional and modern			
Enable the student to unde	erstand the accounting cycle of recording,			
posting and balance				
How to address the decline	e and rise in capital			
How to deal with buying and selling operations and their returns				
Learning outcomes and m	nethods of teaching, learning and assessment			
pwledge and understanding				
Knowledge				
1- Knowing the nature of financial accounting and methods of dealing with				
the market from buying and selling, how to discount and the cost of the				

goods sold

- 2- Know how to deal with personal withdrawals and how to process them
- 3. Know how to match companies
- Subject-specific skills
- 1- Gain skill in accounting in the work environment
- 2- Know how to analyze operations and then register, post, balance and prepare financial statements
- 3- Methods of pricing inventory, sales and purchases, and how to process them

Thinking skills

Ask questions to the student to motivate him to think and participate

8. Course objectives
This course seeks to introduce the intellectual framework of financial accounting and deepen understanding of the accounting
problems related to measuring and presenting assets (current, fixed, and accounting for debtors) and disclosing them in the
statement of financial position in light of accounting standards. It also provides the student with the skills of measuring the
elements of financial statements in light of the accounting cycle and increases his ability to prepare presentation and

- Deepening students' understanding of the concept of accounting information and its characteristics.

disclosure of financial statement items in light of international financial reporting standards.

Course Objectives

- The student learns and gains experience in the field of accounting measurement and disclosure of debtors, methods of preparing bank statement reconciliation and record adjustments in financial statements, and focus on related accounting problems.
- Familiarity with financial accounting standards related to financial statements and the latest amendment them.

Teaching and Learning Strategies:

Teaching and learning strategies

- Providing students with knowledge related to the development of accounting principles and professional practice, the intellectual framework of accounting, accounting treatments for financial statement items, and preparing financial statements in light of International Financial Reporting Standards (IFRS).
- Providing the student with the skills of measuring the elements of financial statements in light of the accounting cycle and increasing his ability to prepare presentation and disclosure of financial statement items in light of international financial reporting standards.
- Giving students the skills to understand, analyze and solve accounting problems
- Knowing how to measure and record accounting operations for assets.
- C- Teaching and learning methods:

Lectures and group discussions

- D- Evaluation methods
- Written tests
- Oral exams
- E- Thinking skills
- The direct method of thinking based on logic in arranging and classifying ideas based on models or criteria defined in advance.
- The indirect method of thinking based on searching for keys to solutions to the problem from a set of available data and information.
- F- Teaching and learning methods

Presenting the problem and then providing direct solutions to the problem on the basis of recognized international accounting practices based on international accounting and accounting standards.

Strategy

Course Structure: Descriptive approach

- 7- promoting the reality of science and education

Teaching and Learning Strategies .9

Strategy

Knowledge and understanding

- 1- Gaining knowledge and the students ability to adopt thinking methods that are appropriate to the size of the problems they face
- 2- training the student and his ability to analyze and interpret
- 3- adopting a lecturing method and linking each topic with examples from the real situation
- 4- teach the student the basic concepts of the subject and topics related to knowledge and understanding and help develop his skills
- 5- teaching the student how to use the internet by obtaining sources reviewing the library and how to write research
- 6- by having the students participate in the lecture relying on their prior preparation for the subject giving them a case study and dividing them into groups to write a report about that study
- 7- evaluation through monthly examinations
- 8- enabling students to write scientific research in the correct manner

teaching and learning methods

- 1- lecture style
- 2- discussion of scientific and practical aspects
- 3- solve exercises using illustrations
- 4- discussions during the lecture

evaluation methods

- 1- through seminars and asking questions
- 2- through monthly examinations
- 3- through daily duties

Course Structure .10

Week	Hours	Learning Required Outcomes	Unit or subject name	Learning method	Evaluation method
1	3	Oil accounting	Characteristics of extractive industries activity and the nature of oil accounting	Giving the lecture	Prepare discuss and solve exercises
2	3	Research and exploration expenses	Research and exploration expenses , IFRS for extractive industries	Giving the lecture	Prepare discuss and solve exercises
3	3	Accounting treatments	Accounting treatments for the research and exploration phase (capital expenditure method)	Giving the lecture	Prepare discuss and solve exercises
4	3	Accounting treatments	Revenue expenditure method, successful expense method	Giving the lecture	Prepare discuss and solve exercises
5	3	Methods of calculating amortization	Methods of calculating amortization for unprepared contracts(Method of cost and duration of each contract separately)	Giving the lecture	Prepare discuss and solve exercises
6	3	Methods of calculating amortization	Methods of calculating amortization for unprepared contracts(Method of A certain percentage of the total number of contracts	Giving the lecture	Prepare discuss and solve exercises
7	3	Closing accounts	Closing accounts and unprepared contracts (upon waiver, conversion to producing contracts, when selling)	Giving the lecture	Prepare discuss and solve exercises
8	3	Closing accounts	Closing accounts and unprepared contracts in the event that amortization is calculated on the basis of a	Giving the lecture	Prepare discuss and solve exercises

			percentage		
9	3	The stage of preparing the well for drilling	Drilling and excavation stage	Giving the lecture	Prepare discuss and solve exercises
10	3	Accounting treatments	Calculation of under – drilled wells / drilling operations(Accounting treatment for capital drilling operations and drilling operations)	Giving the lecture	Prepare discuss and solve exercises
11	3	Production stage	Production stage, Accounting treatments Production stage(proof of revenues and expenses)	Giving the lecture	Prepare discuss and solve exercises
12	3	Running out of productive wells	Methods of calculating the exhaustion of productive wells(fully developed contracts and partially developed contracts)	Giving the lecture	Prepare discuss and solve exercises
13	3	Extinctions	Depreciation of equipment and assets	Giving the lecture	Prepare discuss and solve exercises
14	3	Final accounts	Final accounts of oil companies	Giving the lecture	Prepare discuss and solve exercises
15	3	Oil accounting	Accounting for oil in Iraq (Accounting treatments under the unified accounting system)	Giving the lecture	Prepare discuss and solve exercises

Course Evaluation .11

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

Daily preparation and attendance 10 -----monthly exam for two months 15 -----final written exam 60

Course Name: .1

Accounting for financial institutions

Course Code: .2

1330 m si							
Semester / Year	Semester / Year: .3						
First semester 2023- 2024							
Description Preparation Date: .4							
2024							
Available Attend	dance Forms: .5						
classrooms							
Number of Cred	lit Hours (Total) / Number of Units (Total) .6					
45 / 3							
Course administ	trator's name (mention all, if more than	one name) .7					
Name: Zainab h	nadi mahdi						
Email: zanib. aln	nusawy@qu.edu.iq						
Course Objectiv	es .8						
Course Objectiv		1- Explaining the concept of financial institutions 2- teaching the student how to record accounting 3-transactions and record them separately clarifying accounting treatments 4- how to record banking transactions in books and records 5- developing students talents and abilities through acquired knowledge and scientific and professional experience					
	earning Strategies .9						
Strategy	1- Gaining knowledge and the students ability to adopt thinking methods that are appropriate to the size of the problems they face 2- training the student and his ability to analyze and interpret 3- adopting a lecturing method and linking each topic with examples from the real situation 4- teach the student the basic concepts of the subject and topics related to knowledge and understanding and help develop his skills						
i e	5- teaching the student how to use the internet by obtaining sources reviewing the library and how						

to write research

- 6- by having the students participate in the lecture relying on their prior preparation for the subject giving them a case study and dividing them into groups to write a report about that study
- 7- evaluation through monthly examinations
- 8- enabling students to write scientific research in the correct manner teaching and learning methods
- 1- lecture style
- 2- discussion of scientific and practical aspects
- 3- solve exercises using illustrations
- 4- discussions during the lecture

evaluation methods

- 1- through seminars and asking questions
- 2- through monthly examinations
- 3- through daily duties

Course Structure .10

Week	Hours	Learning Required Outcomes	Unit or subject name	Learning method	Evaluation method
1	3	Introduction to the nature of banking activity	Accounting in banking activity introduction and types of banks	Giving the lecture	Prepare discuss and solve exercises
2	3	Fund secretariat	Fund secretariat section(local currency , foreign currency)	Giving the lecture	Prepare discuss and solve exercises
3	3	Financial department	Debit and credit current accounts	Giving the lecture	Prepare discuss and solve exercises

4	3	Deposits department	Fixed cash deposits and savings	Giving the lecture	Prepare discuss and solve exercises
5	3	Commercial papers department	Discounted bills and transfers	Giving the lecture	Prepare discuss and solve exercises
6	3	Remittances department	Internal and external transfers travelers checks and bills of exchange	Giving the lecture	Prepare discuss and solve exercises
7	3	Credits	Documentary credits section	Giving the lecture	Prepare discuss and solve exercises
8	3	discourses	Letters of guarantee section	Giving the lecture	Prepare discuss and solve exercises
9	3	Exams	The first monthly exam with answers to the exam questions	Monthly test	Monthly test
10	3	Constraint adjustments	Registration settlements and final accounts in banks	Giving the lecture	Prepare discuss and solve exercises
11	3	Insurance companies	Accounting in insurance companies – the nature of insurance companies	Giving the lecture	Prepare discuss and solve exercises
12	3	Accounting treatments	Accounting treatments for insurance operations expenses and revenues with examples	Giving the lecture	Prepare discuss and solve exercises
13	3	Accounting treatments	Accounting treatments for investments and reserves in insurance companies	Giving the lecture	Prepare discuss and solve exercises
14	3	Constraint adjustments	Registration settlements and final accounts of insurance companies	Giving the lecture	Prepare discuss and solve exercises
15	3	Exams	The second monthly exam with answers to the exam	Monthly test	Monthly test

	questions

Accounting Information Systems

2. Course Code:

3. Semester / Year:

Second semester 2023/2024

4. Description Preparation Date:

29/3/2024

- 5. Available Attendance Forms:
- 6. Number of Credit Hours (Total) / Number of Units (Total)

3 hours, total 45 hours

7. Course administrator's name (mention all, if more than one name)

Name: Arshed Makki Rashed

Email: <u>Arshed.makki20@qu.edu.iq</u> 8. Course Objectives

Course Objectives

- 1. Learn about the concept of accounting information systems .
- 2. Addressing data and information
- 3. Determine methods for designing accounting informat systems
- 4. Solve problems in designing accounting information systems
- 5. Learn about big data, e-government and e-commerce
- 9. Teaching and Learning Strategies

Strategy

- 1- Using personal, linguistic and mathematical intelligence strategies.
- 2- Using the brainstorming method and its various methods.
- 3- Using various mind maps.
- 4- Using deductive and inductive

Week	Hours	Required Learning	Unit or subject name	Learning	Evaluation
		Outcomes		method	method
the first	6		Scientific framework for accounting information systems	lecture	Discussion and brainstorming
the second	6		The concept of accounting information systems	lecture	Daily exam
the third	6		The relationship between the accounting information system and the management information system and the distinction between data and information	lecture	Discussion

the fourth	6	First month exam	lecture	Daily exam
Fifth	6	A comparison of views of the qualitative characteristics of accounting information	lecture	Editorial
VI	6	Analysis and design of accounting information systems	lecture	Daily exam
Seventh	6	Accounting information system analysis requirements	lecture	discussion
VIII	6	Requirements for designing accounting information systems in the e-government environment	lecture	Daily exam
Ninth	6	Systems development life cycle	lecture	Editorial
The tenth	6	Big data	lecture	Daily exam
eleventh	6	Second month exam	lecture	discussion
twelveth	6	Data mining	lecture	Daily exam
Thirteenth	6	Accounting information system in the e-government environment, e-commerce	lecture	discussion
fourteenth	6	Requirements for designing accounting information systems in the e-government environment	lecture	Daily exam
Fifteenth	6	A comprehensive review of all the material, discussion with students, and taking a test	lecture	Editorial

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

Calendar			Its percentage of the final evaluation
1	Oral contributions	Throughout the semester	10%
2	Written exam (monthly)	15	30%
3	final exam		60%

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (sources)	Dr Ziad Al-Saqqa / Accounting Information Systems
Recommended books and references (scientific	A collection of scientific research in the field of accounting information systems
journals, reports)	, and the second
Electronic References, Websites

English language
2. Course Code:
3. Semester / Year:
2023/2024
4. Description Preparation Date:
2023

5. Available Attendance Forms:

Weekly

6. Number of Credit Hours (Total) / Number of Units (Total)

15*2=30

7. Course administrator's name (mention all, if more than one name)

Name: Abbas Saad hamada

Email:Abbas.alkhuzaie@qu.edu.iq

8. Course Objectives

- 1- The aim of this course is to take learners smoothly from one topic to another, to enable them to communicate with other speakers of English in real life situations.
- 2- Another aim of this course is to demonstrate how English is used in real life situations, thus, enabling learners' to use it in meaningful contexts.
- 3- The other aim is to build the learners' ability to communicate their ideas fluently, accurately and confidently.
- 4- The topics have been carefully selected to motivate learners and stimulate Learning

9. Teaching and Learning Strategies

- 1- Method of the lecture / method of questioning and discussion.
- 2- Class and homework assignments.
- 3- Discussion style.
- 4- Independent Individual Projects and groups projects.
- 5- Using the dialog & conversations to enrich their ability of speaking.
- 6- Preparation of research and educational posters.

Week	Hours	Required Learning	Unit or subject name	Learning	Evaluation
		Outcomes		method	method
1	2	No place like home	Unit 1	Questioning and discussion, Using the dialog & conversations	assessment Daily examinations & monthly examination
2	2	Been there, done that	Unit 2	questioning and discussion, Using the dialog & conversations	Assessment Daily examinations & monthly examination
3	2	What a story	Unit 3	questioning and discussion, Using the dialog & conversations	assessment Daily examinations & monthly examination
4	2	Nothing but the true	Unit 4	questioning and discussion, Using the dialog & conversations	assessment Daily examinations & monthly examination
5	2	An eye to the future	Unit 5	questioning and discussion, Using the dialog & conversations	assessment Daily examinations & monthly examination

Course Description Form

Sample course description for Financial Reporting Standards for the fourth stage, Accounting

- 1- Course Name: International Accounting Standards for Financial Reporting
- 2- Course code: 1441 M D O / International accounting
- 3- Semester/year: The first course/2023/2024
- 4- Date this description was prepared: 2/9/2023
- 5- Available forms of attendance: Regular attendance in classrooms
- 6- Number of study hours (total) / Number of units (total): 30 study hours

7- Name of the course officer: Hylder M. Koshan AlShamary

8- Course objectives :

1- Study the accounting systems in different countries of the world to reach the most appropriate

system

needs of that state

2- Reaching international foundations, rules and standards that can be used to develop local

accounting systems

3- Showing the reasons for the difference in information and accounting data in the reports of

international companies

4- Providing unified accounting information for international companies

5- Serving the international investor by providing financial statements and reports appropriate to

the decision maker

6- Knowing the extent to which different accounting systems affect the economies of different

countries

Teaching and learning strategies: They are

1- Adopting the method of delivering lectures and linking each topic with examples from the

reality of the situation and the current market environment.

2- Teaching the student the basic concepts of the subject and topics related to knowledge and

understanding of international accounting

3- Teaching the student how to use the Internet by obtaining sources, reviewing the library, and

how to write a report in accordance with international accounting guidelines and their availability

in multinational companies.
